

SPECIFICATION GRADE ACRYLIC & SILICONE ROOF COATING SOLUTIONS

Pond Armor™

OVER 10,000 ACRYLIC ROOF COATING SYSTEMS INSTALLED SINCE 1976

For more than 40 years, Metacrylics® has set the standard for energy efficient coatings by combining innovative formulations with the industry's most comprehensive project support. Metacrylics® develops and supplies sustainable solutions with specification-grade performance, utilizing specification-grade materials and never sacrificing quality.

SUSTAINABLE COOL ROOF SYSTEMS

WITHSTANDS PONDING WATER

Metacrylics formula contains premium resins and other raw materials which create a system which performs under ponding water conditions.

Metacrylics has no exclusions for ponding water on warranties up to 30 years.

NO ZINC OXIDE

The Environmental Protection Agency has identified zinc oxide as a hazardous waste material. Metacrylics® acrylic coatings are formulated without zinc oxide and other hazardous chemicals. By excluding zinc oxide, Metacrylics acrylic coatings provide...

- Better adhesion in ponding conditions
- Higher performance fungicides for increased mold and mildew resistance

TOTAL SERVICE™ TECHNICAL SUPPORT

At Metacrylics, it is our mission to deliver unrivaled support, remaining committed to providing those involved in the project from building owners to installers with the expert advice needed to succeed.

Consultation: We help assess projects to determine which system is needed. We understand that not every job is the same and work to provide solutions for any roof project, common or unique.

Training: Depending on the size of the job and the system used, we provide applicator training to ensure proper installation.

Technical Assistance: In consideration of the complexity of each project we provide virtual and hands on technical support during installation.

Inspection: We may walk and inspect the work to make sure the installation was done properly and certify the job for warranty.

Follow-Up: Long after the completion of the project, we continue to check in and make sure the system is performing as expected. For our renewable warranty options, we will re-inspect roofs when needed to determine the best option for extending the life of the roof system.

Our Total Service™ approach, combined with our specification grade products, is what separates Metacrylics® when it comes to customer satisfaction.

OUR CUSTOMERS

METACRYLICS *EXTENDS THE LIFE OF THE ROOF*

DURABLE: Metacrylics® offers renewable warranty options up to 30 years. Metacrylics® coatings stop leaks, withstand ponding water, and carry a wide range of certifications.

FLEXIBLE: Our specification grade system maintains strong adhesion to nearly any roofing surface in any climate, withstanding building and roof movement, expansion, and contraction.

ENERGY EFFICIENT: 90%+ reflectivity can provide up to 30% and more energy savings by reducing roof temperature and AC usage.

COMPLIANT: ICC-ES, Energy Star, Miami Dade County Approved, UL Class A Fire Rated, Title 24 Part 6 Cool Roof Compliant. No zinc oxide.

QUALITY ASSURED: UL performs regular manufacturing inspections to assure that all products are made using the same chemical formula and are uniform in quality.

SEAMLESS: Layered monolithic roof system with no seams or other potential leak points.

FEATURES & BENEFITS

- | | |
|---|--|
| • Withstands ponding conditions | • No harmful zinc oxide or solvents |
| • 40+ years of coating experience | • Up to 30 year renewable warranties available |
| • Total Service™ Technical Support | • Easy spray, roll, or brush application |
| • Save up to 30% and more on energy costs | • Extends roof lifespan |
| • Meets all hazardous requirements | • Avoids costly tear-offs |

METACRYLICS WATERPROOFING SYSTEM APPLICATION

PROTECT YOUR ROOF WITH METACRYLICS POND ARMOR!

Pond Armor™

Metacrylics Pond Armor formula contains premium resins and other raw materials to create a system which performs under ponding water conditions.

- NO WARRANTY EXCLUSIONS FOR PONDING WATER
- MAXIMUM PROTECTION - UP TO 30 YEAR NDL WARRANTY
- OVER 40 YEARS OF ROOF COATING EXPERIENCE

METACRYLICS FAMILY OF PRODUCTS

TOP COATS

EXTREME PERFORMANCE + ACRYLIC WHITE

is a white acrylic elastomer coating that is non-volatile and offers our best mechanical properties tensile strength, elongation and tear resistance. Extreme Performance withstands ponding water and is usable on nearly any roofing surface.

EXTREME WEATHER ACRYLIC WHITE is a white acrylic elastomeric coating that is non-volatile and provides better adhesion, durability, and reflectivity. Extreme Weather Acrylic withstands ponding water and is usable on nearly any roofing surface.

Q COAT™ is a fast setting water based acrylic roof coating that is rain resistant in 30 minutes, recoatable in 2- 6 hours and applicable over virtually any roof substrate.

EXTREME WEATHER ACRYLIC COLOR is a colored, acrylic elastomeric coating that is non-volatile and provides better adhesion, durability, and reflectivity. Available in over 50 color options.

CONTRACTOR GRADE ACRYLIC WHITE is a white acrylic elastomeric coating that is non-volatile and provides solid adhesion, durability, and competitive reflectivity on nearly any roofing surface.

ROOF & TILE SEALER is a concrete and tile sealer that combines finish clarity and durability. Available in clear and 30 color options.

SILICONE (HIGH SOLIDS) is formulated for superior reflectivity, durability, UV resistance and is low VOC. Our High Solids Low VOC Silicone offers faster cure times and is not affected by ponding water. We offer both spray grade and roll grade versions.

BASE COATS

CLEAR BASE is a clear, self-priming, acrylic elastomeric coating. Clear Base is a highly adhesive coating used as a primer or base coat for fabric reinforced systems, and must be protected with a Metacrylics top coat.

GRAY BASE is a gray, acrylic elastomeric coating. Gray Base is a highly adhesive coating used as a base coat for fabric reinforced roof and deck systems. Gray Base must be protected with a Metacrylics top coat.

CONTRACTOR GRADE CLEAR & GRAY BASE is a clear or gray, self-priming, acrylic elastomeric coating to be used as a primer or base coat for fabric reinforced systems. This coating must be protected with a Metacrylics top coat.

GELS/LIQUID FLASHING

ACRYLIC GEL is an acrylic elastomeric product for thorough leak proofing or repair over any roof surface.

SILICONE GEL (HIGH SOLIDS) is a silicone formula used for thorough leak proofing or repair over any roofing surface.

PRIMERS

BLEED BLOCKER PRIMER is a clear acrylic primer formulated for asphalt based surfaces. Bleed Blocker provides resistance to asphalt staining and improves the adhesion of the coating to the roof surface.

BLACK PRIMER is a rust inhibiting, highly adhesive primer. Once cured, Black Primer has no surface tackiness and is resistant to traffic or movement of equipment.

EPDM RINSE is a low viscosity liquid used to pre-treat black EPDM roofs. EPDM Rinse increases adhesion of the Metacrylics coating to the roof membrane.

TPO PRIMER is a water-based primer designed to improve adhesion onto a wide range of TPO roofs.

ROOF & TILE PRIMER is a clear, acrylic primer. Roof & Tile Primer is surface penetrating and used with our Roof & Tile Sealer.

POLYURETHANE PRIMER is a two-component, high solids penetrating primer for re-coating existing urethane roof systems.

EPOXY PRIMER is a two component penetrating primer that offers quick curing & re-coating times.

WALKWAY YELLOW™ is an acrylic coating alternative to solid walkway products that creates walkable paths to access points and areas that require routine maintenance.

FABRIC

POLYESTER FABRICS provide the ideal strength and elongation for Metacrylics roof and deck systems over flat or irregular surfaces. Soft, medium, firm, and filament knit available.

Q COAT™

Work Faster.

Save Time & Labor on Your Coating Projects.

- Same performance in ponding conditions as our standard system. Metacrylics acrylic systems withstand ponding conditions, and ponding is not excluded from any warranty.
- Q COAT can set up and be recoated in as soon as two hours.
- No Zinc Oxide
 - Better adhesion in ponding conditions
 - Higher performance fungicides for increased mold and mildew resistance
- Rain resistant in 30 minutes!
- Systems for all roofing surfaces.
- Same Metacrylics warranties available up to 30 years.
- Apply with standard roof coating sprayers (one part), or rolled.
- Low Odor

PACKAGING

2 Gallon	Pail
5 Gallon	Pail
55 Gallon	Drum
275 Gallon	Tote

DESCRIPTION WHITE, fast setting water-based elastomeric coating with built in bleed block and early rain resistance. Non-volatile, highly adhesive, UV resistant, reflective, protective coating for almost any surface.

USES For use as a reflective protective coating over BUR Asphalt, T&G, Granulated Capsheet, Rolled Roofing, Metal, Concrete, Wood, Foam, EPDM, TPO, PVC and Stucco surfaces. When applied with Metacrylics Primer, Base, and Polyester fabric, this product is recommended for all roofs and decks. Other uses include exterior and below grade waterproofing.

ZINC OXIDE Metacrylics Q COAT™ Acrylic White contains no zinc oxide. California Prop. 65 has identified zinc oxide as a hazardous material. No product manufactured by Metacrylics contains zinc oxide. This has been verified by independent testing by ICC-ES and UL Laboratories, our quality control agency.

Metacrylics Walking Deck Application

Metacrylics is the perfect solution for exterior walking decks. Combining performance and aesthetics, Metacrylics enhances the look of any walkway or deck while also providing a durable walking surface that protects the deck surface from water absorption and UV damage. Metacrylics coatings provide a decorative, walkable finish with excellent long-term color retention.

Metacrylics Roof & Tile Sealer

Construction / Technical Data Sheet

DESCRIPTION

Metacrylics Acrylic Roof & Tile Sealer is a water-based coating that combines the gloss, clarity and weathering characteristics found in acrylics with the toughness and durability of epoxies. Metacrylics Roof & Tile Sealer may be used as a seal or topcoat for indoor and outdoor roof and tile surfaces, e.g., Metacrylics or other acrylic coatings, natural stone, terrazzo, metal, concrete, slate, clay and tile roofing surfaces. The built-in resistance to ponding water and oils make it the right product for roofs, decks, warehouses, concrete garages, etc. Clear Acrylic Roof & Tile Sealer exceeds the Coefficient of Friction Safety Standard ASTM Designation D-2047. It also complies with VOC anti-smog ordinances.

Color

CLEAR or 36 COLORS

Features

Metacrylics® Roof & Tile Sealer is an all-acrylic latex dispersion that is suitable as a binder for EIFS basecoats and topcoats. Topcoat finishes protected with Metacrylics Roof Tile Sealer show good water resistance, easy workability, and increased resistance to dirt pick-up, freeze-thaw resistance, excellent color retention and weather-ability. Films obtained from it are tough, flexible, tack-free at room temperature and very resistant to water absorption. Since base-coat stability can vary based on the type of cement and conditions of use, dispersing aids may be needed to attain desired workability.

PROPERTIES

Product Specifications*

Color	White, Stable Emulsion, Dries Clear
pH	7.9(±0.2)
Specific Gravity	1.03
Volume by Weight	8.3lbs/gal
V.O.C. Content	<3%
Refractometer Solids	22.5%(±0.2%)
Flash Point	None (C.O.C. Method)
Gloss	90 (ASTM Test D-523, 60°)
Safety	Exceeds Slip Resistant Reqs. (ASTM Test D-2047)
Leveling	Excellent (ASTM Test D-2801)
Re-coatability	Excellent (ASTM Test D-3153-78)
Drying Time	At 68°F and 50% relative humidity: Set to touch in 30 minutes. Re-coat in 1-2 hours. Ready for light traffic in 4-8 hours. Vehicle/heavy traffic 12-24 hours after final coat. Do not apply if rain or moisture are forecasted within 24 hours of application.

Package sizes

1 gallon, 5 gallon, and 55 gallon drum

* These figures should be taken for comparison purposes only. All that can be obtained from it is an idea of the order of magnitude.

APPLICATION

Preparation

Surface must be thoroughly cleaned and rinsed; always use TSP for fast efficient removal of dirt and oils. Pressure wash old roofs or decks prior to application. Always test non-Metacrylics surfaces in an inconspicuous area prior to use.

Roof & Tile Sealer

Roof Coating Innovation Since 1976

For more than 40 years, Metacrylics® has set the standard for energy efficient coatings by combining innovative formulations with the industry's most comprehensive project support. Metacrylics® develops and supplies sustainable solutions with the highest level of performance, utilizing the finest ingredients available and never sacrificing quality.

As of 2017 Metacrylics is an IPS Roofing Products Company.

METACRYLICS ACRYLIC GEL

Metacrylics Acrylic Gel is an elastomeric, liquid-applied flashing that permanently stops leaks over seams, scuppers, drains, wood blocks, wood sleepers, HVAC supports, HVAC Ducting joints, skylights, pitch pockets, parapet coping, gutters, vents, edge flashing, gravel stops, and other common leak areas.

Due to its excellent adhesion, Metacrylics Gel can be used over nearly any roofing surface including BUR Asphalt, Tar & Gravel, Granulated Capsheet, Metal, Concrete, Wood, Foam, EPDM, TPO, PVC, Stucco and previously coated surfaces.

Metacrylics Acrylic Gel can be used as part of a complete Metacrylics cool roof restoration system or as a maintenance or spot repair flashing solution over existing roofing surfaces.

METACRYLICS SILICONE GEL

Metacrylics Silicone Gel is a high solids silicone liquid-applied flashing that permanently stops leaks over common leak areas. Metacrylics Silicone Gel can be used as part of a complete Metacrylics Silicone roof restoration system or as a maintenance or spot repair flashing solution over existing roofing surfaces.

Metacrylics Silicone Gel can be used over nearly any roofing surface including modified bitumen, built-up roofing, metal, polyurethane foam, wood, concrete and a variety of single-ply systems. Its fast curing time helps the applicator save time.

PERMANENT LEAK REPAIR — FOR ANY ROOF SURFACE —

(1Gal, 2Gal, 3.5Gal, 5Gal)

Available in **WHITE, GREY, or CLEAR**

ADHERES TO ALL SURFACES

METACRYLICS GEL PROVIDES STRONG ADHESION AND UV RESISTANCE FOR A DURABLE SEAL

EASY APPLICATION

METACRYLICS GEL CAN BE USED ON VIRTUALLY ANY ROOF SURFACE AND CAN BE BRUSHED, ROLLED, OR TROWELED.

NO ZINC OXIDE

LIKE ALL METACRYLICS PRODUCTS, METACRYLICS GEL IS FORMULATED WITH HIGH QUALITY RESINS AND WITHOUT ZINC OXIDE, ALLOWING FOR BETTER ADHESION, REDUCED CHALKING AND BREAKDOWN, AND ADDED FUNGICIDES

Pond Armor

SPECIFICATIONS

DESCRIPTION Water-based acrylic elastomeric mastic for flashing and fabric reinforcement repairs. Non-volatile, highly adhesive, UV resistant, extremely reflective, resistant to thermal shock and moisture.

USES Use to repair roof blisters, field seams, drains, scuppers, copping, splits, cracks, fishmouths, perimeter base & curb flashings over wood, metal, concrete, urethane, epoxies, rubber, single-ply, BUR asphalt, emulsion, and other surfaces. A highly elastic, adhesive, flexible waterproofing caulking, especially when used with the Stitch-bond Polyester Fabric reinforcement. Also, used to waterproof and seal all roof penetration details for Metacrylics roof restoration solutions.

COLOR White, Gray, and Clear

ZINC OXIDE: Metacrylics Acrylic GEL contains no zinc oxide. California Prop. 65 has identified zinc oxide as a hazardous material. No product manufactured by Metacrylics contains zinc oxide. This has been verified by independent testing by Aquifer Sciences, Inc.

TITLE 24: Compliant. Cool Roof Rating Council testing: C-1371 Solar Reflectance 0.87 and C-1371 Thermal Emittance 0.90. CRRC Seller ID No: 0660.

LEED POINTS: Available for heat island affect.

USGBC: U.S. Green Building Council member

ICC-ES: ICC-Evaluation Services, Inc. listed Report No. 4785 complying with U.S. Building Codes.

UL Classified: Quality Control Agency and Class A Fire and Wind Uplift rated.

WEATHERING: 2,000 hours weatherometer - no cracking, crazing, or erosion, slight chalking. ASTM D638

TEMPERATURE CYCLING AND PENETRATION: Tests conducted in accordance with the "Acceptance Criteria for Special Roofing Systems" as published by the International Conference of Building Officials (ICC-ES). Results: PASS. Samples averaged 1.626 before testing. Samples averaged 1.610 after being subjected to the Weatherometer. The change in thickness was less than 1%. Examination of the samples after testing showed no evidence of tearing or cracking of the protective coating.

*Temperature Cycling and Penetration Testing: 25 continuous cycles of 1 hour of water exposure at room temperature prior to 6 hours at -40° F, 2 hours at 70° F, 14 hours at 180° F and 1 hour at 70° F. Spray nozzles delivered 6 in. of water per hour at a temperature of 40° F to 60° F. At the conclusion of the 25 cycles the specimens were examined.

FLASHPOINT No flash at 200° F (water-based). ASTM 1310, Tag Open Cup

FLEXIBILITY Low Temperature Flexibility: pass 1" :-40° F ASTM C836

TENSILE STRENGTH *Includes Metacrylics Stitchbonded polyester fabric (10 mils)

STRENGTH: 156 PSI (81 mils*) Strength at break 1,914 PSI 74o F ASTM D412 (10 mils)

ELONGATION: 149% ave(81 mils*) Strength at break 3,540 PSI, 0o F ASTM D412

HARDNESS Shore A 41 ASTM D-676 (8 days cure + 4 hours 120° F)

PERMEABILITY 0.01 milligrams water loss. Payne Permeability cups.

PEEL ADHESION Concrete: 6.3 average lbs./linear inch ASTM C836

PERMEABILITY: 0.016 Perms ASTM D1653 (81 mils dry film thickness) (Water Vapor Transmission)

NOTICES

Metacrylics® products must be applied and installed according to written specifications from the manufacturer. Metacrylics® assumes no liability for failures of this roof/deck system resulting from deviation from manufacturer's written specification, poor workmanship, or delamination of an existing underlying roof/deck membrane. The manufacturer makes no warranty of any kind, express or implied, concerning this roof/deck system, if it is not used according to manufacturer's specifications.

Metacrylics® SILICONE GEL

Single Component Roof Sealant

Technical Data Sheet

SPECIFICATIONS

DESCRIPTION AND RECOMMENDED USES: Metacrylics Silicone GEL is an extremely versatile, tough, yet flexible flashing membrane that is easily brush or trowel applied at thicknesses up to 1/4". Metacrylics Silicone GEL can be used over a variety of roofing substrates including direct-to-metal (DTM), spray polyurethane foam, smooth built up, smooth modified, granulated modified, concrete, a variety of single-ply systems, flashings, fasteners, field seam, scuppers, and drains. It is designed to create a watertight liquid flashing for problematic roofing detail repairs.

FEATURES & BENEFITS This highly reflective and UV resistant membrane has excellent adhesion, vertical hang capabilities and performs exceptionally under ponding water conditions. Metacrylics Silicone GEL can be used as part of a complete cool roof restoration system and/or used for repairs of existing systems, roof repairs such as flashings, penetrations, seams, HVAC ducting, fasteners, scuppers and drains. This single component, Low VOC, moisture cured liquid flashing membrane is also environmentally friendly.

TYPICAL USES

- Can be used for spot repairs
- Reinforce seams, flashings and penetrations
- Seal joint and penetration repairs for solar systems and air conditioning systems

GENERAL PROPERTIES High Solids 94% (±2) percent by volume ASTM D-2697-3

STANDARD COLORS White

PHYSICAL PROPERTIES Material tested complies with all the requirements of ASTM D- 6694-01 Standard Specification Liquid-Applied Silicone Coating used in Spray Polyurethane Foam Roofing.

PACKAGING	2 & 3.5 gallon buckets
COVERAGE RATE	25 sq ft / gal
COLOR	White
SHELF LIFE	1 year (unopened)
TACK FREE, (75°F, 50% RH)	>3 Hrs
CURE TIME (75°F, 50% RH)	24 Hrs
DUOMETER HARDNESS: SHORE A	45-55
WEATHERING QUV 5,000 HRS.	No Degradation
PERMEABILITY (U.S. PERMS)	7.9
TEAR STRENGTH	45lbs/in
SOLIDS BY VOLUME, ASTM D-2697	94%-(± 2)
SOLIDS BY WEIGHT, ASTM D-2697	94%-(± 2)
FLASH POINT, ASTM D-56	142°F
VISCOSITY	50,000 cps
TENSILE STRENGTH (DIE C, ASTM D-412)	300 psi
ELONGATION, ASTM D-412	200%

DIRECTIONS FOR USE

Review all technical data sheets, system sheets, labels, instructions, SDS, and Guide Specifications before applying. Cure time will vary based on temperature and atmospheric conditions.

APPLICATION: Prior to coating any surface, be sure the coating will adhere by performing an adhesion test (ASTM D-903). Coating may be applied by brush, spatula or trowel. Do not apply when temperatures are below 40°F (4.4°C) or when precipitation is in the forecast within 2 hours.

LIMITATIONS: To avoid pin holes and blistering Metacrylics Silicone GEL should not be applied at a rate no thicker than 250 wet mils (6350 µ) in one application.

NOTICES

Metacrylics® products must be applied and installed according to written specifications from the manufacturer. Metacrylics® assumes no liability for failures of this roof/deck system resulting from deviation from manufacturer's written specification, poor workmanship, or delamination of an existing underlying roof/deck membrane. The manufacturer makes no warranty of any kind, express or implied, concerning this roof/deck system, if it is not used according to manufacturer's specifications.

Metacrylics® High Solids SILICONE

Single Component High Solids Silicone Cool Roof Top-Base Coat

Technical Data Sheet

SPECIFICATIONS

DESCRIPTION a single-component silicone coating specifically designed with high volume solids. Metacrylics High Solids Silicone is available in a Roll Grade for use with rollers and brushes and a Spray Grade for use with spraying equipment.

GENERAL PROPERTIES High Solids, 100% silicone content, rapid cure

RECOMMENDED USES Can be applied as a part of a maintenance or repair program or as part of a complete roof restoration system. Can be used to reinforce and seal field seams, roof penetrations, drains, scuppers, flashings, membrane splits and cracks as well as spot repairs for general roofing maintenance. The roof surfaces that can be applied over are limitless; BUR Modified Bitumen (Granulated or Smooth), Torch-down, Metal, TPO, EPDM, PVC, Foam, Tar & Gravel and Concrete.

PRODUCT LIMITATIONS Not recommended for continuous immersion service, for use in cryogenic tank, or cold storage roofing applications without a vapor barrier, or directly over modified Bitumen, asphalt or coal tar built-up roofing systems without an appropriate primer.

PONDING WATER The Metacrylics® High Solids Silicone Roof Membrane is not affected by ponding water, however, The National Roofing Contractors Association considers ponding water on any roof undesirable and recommends that all roof systems be designed and built to ensure positive drainage. (See the NRCA Roofing and Waterproofing Manual). Please consult Metacrylics® Technical Department for any specific questions regarding the application of this product.

STANDARD COLORS White, Light Grey, and Tan. Special colors are available upon request at additional charge and with minimum order quantity requirement limits. *Allow additional 15 days for non-standard colors.

	ROLL GRADE	SPRAY GRADE

Recommendations or statements, whether verbal or in writing, other than those contained herein shall not be binding upon the manufacturer, unless in writing and signed by a corporate officer of the manufacturer. Technical and application information is provided for the purpose of establishing a general profile of the material and proper application procedures. Test performance results were obtained in a controlled environment and Metacrylics makes no claim that these tests or any other tests, accurately represent all environments.

ITEM #241050

Coating available in 5 gallon pails (Including sand)

WalkwayYellow™

ACRYLIC COATING SYSTEM

ALTERNATIVE TO SOLID WALKWAY PRODUCTS

- Creates walkable paths to access points and areas that require routine maintenance
- Prevents damage to coated areas of the roof
- Clearly identifies roof edges, rooftop equipment, drains, and other areas to avoid
- Meets ANSI A137.1 dynamic coefficient of friction test for international building code
- Easy to install; Can be brushed, or rolled
- Already included granules for ease of installation
- Durable coating will not prematurely fade or wash off
- Included in full roof acrylic system warranties up to 30 years

Acrylic Penetration Detail Instructions

GUTTERS

1. Thoroughly pressure wash gutters. Rusted areas must be replaced with new gutters.
2. Apply primer to gutters.
3. 3-course with GEL & FABRIC over all joints. Do not use PEEL & COAT on any gutters!
4. Gutters can be coated with Metacrylics Acrylic White or Metacrylics Silicone White.

PARAPET COPING (CAP)

1. Thoroughly wash or pressure wash parapet coping.
2. Prime coping. Any rusted areas must be primed with black primer instead of clear primer.
3. 3-Course with GEL & FABRIC over the top of the coping (cap) joints and screws.
4. Coat with WHITE topcoat.

NOSINGS, EDGE FLASHINGS, & GRAVEL STOPS

1. Apply primer to all edge flashings. If new, wipe with vinegar or suitable cleaning agent.
2. Apply 3-Course with 6"-9" FABRIC & GEL over the top of the edge flashing.
3. Apply the 3-Course 3" on horizontal flashing and 3" on vertical flashing on the outside wall.

WOOD BLOCKS

1. Lift and remove block.
2. Apply GEL or ACRYLIC BASE & WHITE coating to the area.
3. Allow to dry and replace block.
4. If damage to the roof occurs while removing block, 3-Course with GEL & FABRIC and replace block when dry.

WOOD SLEEPERS (HVAC SUPPORTS)

1. Jack up HVAC unit and remove sleeper.
2. Install Metacrylics 1-Ply or granulated slip sheet under entire area of sleepers and HVAC.
3. When the system is cured, replace sleepers. Be sure that lags attaching HVAC to sleepers are not too long and will not penetrate the roof system.
4. If sleepers cannot be moved or lifted, they must be completely encapsulated. The area under HVAC should be coated with Metacrylics and reinforced with fabric.

Acrylic Penetration Detail Instructions

HVAC DUCTS

1. Thoroughly pressure wash all ducts.
2. 3-Course duct joints with Metacrylics ACRYLIC GEL & fabric or apply 4" peel & Coat Tape over joints.
3. Apply 2 gals/SQ of Metacrylics ACRYLIC WHITE in two applications of 1 gal/SQ of ACRYLIC WHITE.

SKYLIGHTS

1. 3-Course up the side of the skylight curb a minimum of 3" and onto the field area 3". Be careful not to cover any weep (drainage) holes in the skylight.
2. Apply ACRYLIC GEL to all exposed screw heads.

PITCH POCKETS

1. Fill pitch pocket with Metacrylics ACRYLIC GEL.
2. 3-Course with GEL & FABRIC over the top of the pitch pocket and down to the base of the pitch pocket, and at least 3" onto the roof.
3. Apply ACRYLIC GEL to the penetration exiting the pitch pocket for 10" in length.

SCUPPERS & DRAINS

1. Remove all old asphalt, mastic, and roofing materials around and inside the scupper. For drains, remove the drain screen, clamp ring, and screws.
2. Thoroughly apply Metacrylics primer to scuppers and drains.
3. For scuppers:
 1. Apply Metacrylics GEL liberally to the inside and outside of the scupper
 2. Cut a 9"-20" square piece of fabric and embed into the GEL. Sometimes overlapping 4" strips of fabric into GEL may be preferred depending on the size of the scupper.
 3. Embed the fabric at least 4" into and around the inside of the scupper.
 4. Apply a cover coat of Metacrylics ACRYLIC GEL.
4. For drains:
 1. 3-Course with GEL & FABRIC into the drain pipe at least 2".
 2. Take a 20" or 40" square of fabric and place over the drain, cutting a hole out for the drain.
 3. 3-Course then reattach drain ring and screen cover.

Silicone Penetration Detail Instructions

GUTTERS

1. Thoroughly pressure wash gutters. Rusted areas must be replaced with new gutters.
2. Apply Metacrylics Rust Inhibitor Acrylic Black Primer to gutters at the rate of 1 gallon/SQ.
3. 3-course with alternating layers of HS Silicone & fabric over all joints or apply Silicone Gel with no reinforcement over joints. Do not use Peel & Coat on any gutters.

PARAPET COPING (CAP)

1. Thoroughly wash or pressure wash parapet coping.
2. Prime coping. Any rusted areas must be primed with Rust Inhibitor Primer (Metacrylics Rust Inhibitor Acrylic Black Primer or Metacrylics 2-Part Epoxy Primer).
3. 3-Course over the top of the coping (cap) joints and exposed screws with alternating layers of Metacrylics HS Silicone and fabric or apply Metacrylics Peel & Coat tape to coping joints and exposed screws and apply Metacrylics HS Silicone/Silicone Gel over tape.

NOSINGS, EDGE FLASHINGS, & GRAVEL STOPS

1. Apply primer to all edge flashings. If new, wipe with vinegar or suitable cleaning agent.
2. Apply 3-Course with alternating layers of Metacrylics HS Silicone & 6" fabric or Silicone Gel (without fabric reinforcement) over the top of the edge flashing.
3. Apply the 3-Course or Gel up 2"-3" onto flashing and 3"-4" onto roofing surface.

WOOD BLOCKS

1. Lift and remove block.
2. Apply Silicone Gel to the area the block was sitting.
3. Allow to dry and replace block.
4. If damage to the roof occurs while removing block, 3-Course with HS Silicone or Silicone Gel & Fabric and replace block when dry.

WOOD SLEEPERS (HVAC SUPPORTS)

1. Jack up HVAC unit and remove sleeper.
2. Apply Metacrylics HS Silicone at the rate of 2 gallons/SQ in the area the wood sleeper had been or granulated slip sheet under entire area of sleepers and HVAC.
3. When the system is cured, replace sleepers. Be sure that lags attaching HVAC to sleepers are not too long and will not penetrate the roof system.
4. If sleepers cannot be moved or lifted, they must be completely encapsulated with Metacrylics HS Silicone. The area under HVAC should be coated with Metacrylics HS Silicone.

Silicone Penetration Detail Instructions

HVAC DUCTING

1. Thoroughly pressure wash all ducts.
2. 3-Course duct joints with alternating layers of Metacrylics HS Silicone & fabric.
3. Apply 2 gals/SQ of Metacrylics HS Silicone in two applications of 1 gal/SQ of HS Silicone.

SKYLIGHTS

1. 3-Course with alternating layers of Metacrylics HS Silicone and fabric up the side of the skylight curb a minimum of 3" and onto the roof surface area 3". Be careful not to cover any weep (drainage) holes in the skylight.
2. Apply Silicone Gel to all exposed screw heads.

PITCH POCKETS

1. Fill pitch pocket with Metacrylics HS Silicone or Silicone Gel
2. 3-Course with HS Silicone & fabric over the top of the pitch pocket and down to the base of the pitch pocket, and at least 3" onto the roof.
3. Apply Silicone Gel up and around the penetration coming from the pitch pocket a minimum of 6".

SCUPPERS & DRAINS

1. Remove all old asphalt, mastic, and roofing materials around and inside the scupper. For drains, remove the drain screen, clamp ring, and screws.
2. Thoroughly apply Metacrylics primer to scuppers and drains.
3. For scuppers:
 1. Apply Metacrylics HS Silicone liberally to the inside and outside of the scupper
 2. Cut an appropriate size piece of fabric for the width of the scupper and embed into the Silicone inside and outside of scupper a minimum of 4".
 3. Apply a cover coat of Metacrylics HS Silicone to saturate and encapsulate the fabric.
4. For drains:
 1. 3-Course with alternating layers of HS Silicone or Silicone Gel & fabric into the drain pipe at least 2". Use a 20" or 40" square piece of fabric and place over the drain, cutting a hole out for the drain.
